# Talent Development

Set up "professional sequence" VS "management sequence" two growth channel

- Talent is an important resource of Canton Biologics. Canton always adheres to the idea of "talent achievements career, career achievements talent", and strives to become the "best employer" in every employee's mind, so as to enhance the competitive advantage of enterprise talent.
- The company's training is committed to improving the three-dimensional training mode supplemented by "teaching training", dominated by "on-job practice" and soul of "double tutor system", creating a special training sequence of graduates "Polaris Plan" to meet the development needs of graduates with different characteristics and advantages.
- Canton Biologics adheres to the horseracing culture, and the promotion mechanism guarantees absolute openness and fairness. Most of the middle and senior management are promoted from within, and the middle positions are open to the whole company.

# Senior Scientist of Research & Development

## Guangzhou
